Netcentric Wins 2010 North America Oracle Titan and Global Partner of the Year Awards
Recognized for Integrated 'SQL to Silicon' Oracle-Sun Database Acceleration Solution

San Francisco, California - September 20, 2010 - Netcentric systems is the first-ever Oracle partner to receive a North American Titan Award for a solution based on the combined Oracle-Sun technology stack. In addition to this milestone, Netcentric is also the first recipient of the Global Partner of the Year Award in Sun Servers and Storage.

The Oracle Titan Awards are given by Oracle to its leading partners for innovative solutions and business achievements. The Oracle PartnerNetwork Global Awards separately recognizes partner excellence in a number of categories, including technology, applications, industry, midsize, and for the first year, Sun servers and storage. Oracle solutions nominees were judged by a renowned team of IDC executives and analysts.

"Netcentric can provide customers with differentiated database acceleration solutions that are prime examples of Oracle's 'Software-Hardware-Complete' value proposition," said Tom Wagner, Oracle Group Vice President, North America Hardware Alliances and Channels. "Behind this success is Netcentric's deep knowledge of the database, operating system, data management and hardware layers of the Oracle technology stack."

Netcentric's solution for Oracle-Sun hardware was developed for a financial services firm and implemented across multiple US offices. The solution achieved the right balance of cost and performance while simplifying management of the company's business-critical securities pricing database systems. As a result, the client has dramatically improved its query response times and service levels, allowing them to expand their data feed service capabilities while significantly reducing operating costs for the business.

###

About Netcentric systems LLC

Netcentric systems, a Platinum partner in the Oracle PartnerNetwork (OPN) Specialized program, is the first partner to achieve specializations in Oracle Solaris, Oracle Sun SPARC Enterprise T-series and M-series servers.

Netcentric systems delivers complete, open, and integrated data-driven infrastructure solutions for business-critical applications. Its mission is to develop trusted advisory relationships with clients, helping them leverage technology for business advantage in their respective industries.
